Annual Subscription Rates (1985)

US$330.00 (2-yr rate US$627.00)—For libraries, government laboratories, research establishments, manufacturing houses and other multiple-reader institutions. Price includes postage and insurance. Published monthly, 1 volume per annum.

Specially Reduced Rate for Individuals

In the interests of maximizing the dissemination of the research results published in this important international journal we have established a two-tier price structure. Any individual, whose institution takes out a library subscription, may purchase a second or additional subscriptions for personal use at the much reduced rate of US$75.00 per annum.

Microform Subscriptions and Back Issues

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

Anil C. Mehta 1 High-pressure liquid chromatographic determination of some 1,4-benzodiazepines and their metabolites in biological fluids: a review

J. F. Tyson and J. M. H. Appleton 9 A continuous-dilution calibration technique for flame atomic-absorption spectrophotometry

E. R. Clark and El-Sayed A. K. Yacoub 15 Indirect determination of organic compounds by atomic-absorption spectrophotometry

J. Vazquez Ruiz, A. Garcia de Torres and J. M. Cano-Pavon 29 Fluorescence properties of some Schiff's bases derived from 3-hydroxypyridine-2-aldehyde and of their metal chelates. Fluorimetric determination of manganese based on its catalytic effect on the oxidation of these compounds with hydrogen peroxide

A. Corsini, A. Chan and H. Mehdi 33 Spectrophotometric determination of carbon monoxide with ruthenium(II) octaethylporphyrin

K. Dittrich, B. Ya. Spivakov, V. M. Shkinev and G. A. Vorob'eva 39 Molecular absorption spectrometry (MAS) by electrothermal evaporation in a graphite furnace—IX. Determination of traces of bromide by MAS of AlBr after liquid–liquid extraction of bromide with triphenyltin hydroxide

Ulla Lundström, Åke Olin and Folke Nydahl 45 Determination of low levels of bromide in fresh water after chromatographic enrichment

Michael J. Avery, John J. Richard and Gregor A. Junk 49 Simplified determination of polycyclic aromatic hydrocarbons

I. K. Gregor and M. Guilhaus 55 Detection limits and surface interactions in quantitative negative chemical-ionization mass spectrometry. Ultratrace determination of metals and organic compounds by means of their complexes

I. N. C. Ling and G. Svehla 61 Determination of traces of osmium by the catalysed hydrogen peroxide–cyanocuprate(I) reaction

Angel Schischkov, Shivko Dentschev und Christina Malakova 69 Elektrochemische Untersuchung von bis(Diphenyldithiophosphin) Disulfid

Short Communications

Liyi Zhou, T. T. Chao and A. L. Meier 73 Determination of total tin in geological materials by electrothermal atomic-absorption spectrophotometry using a tungsten-impregnated graphite furnace

Abdel-Aziz M. Wahbi, Essam A. Lotfi and Hassan Y. Aboul-Enein 77 Spectrophotometric determination of tranexamic acid with chloranil

G. Subramanian, Navin Chandra and G. Prabhakara Rao 79 Estimation of chloride in oxidizing media by means of ion-selective electrodes

Walace A. de Oliveira and Celio Pasquini 82 Determination of water in ethanol and acetone by direct injection enthalpimetry based on the heat of dilution

M. Blanco and S. Maspoch 85 Determination of cyanide by a highly sensitive indirect spectrophotometric method

Annotation

Elsie M. Donaldson, E. Mark and Maureen E. Leaver 89 Comparison of silver results for Canadian reference ores and concentrates and zinc-processing products by acid decomposition, tribenzylamine/chloroform extraction and fire-assay combined with atomic-absorption spectrophotometry

VOL. 31 1984

Aims and Scope

TALANTA, published monthly, provides a forum for the rapid publication of original research papers, preliminary communications, full reviews and mini-reviews. Other features are annotations (critical commentaries), analytical data (stability constants *etc.*) and letters to the editor.

In addition to welcoming papers in the traditional fields of pure and applied analytical chemistry, and in order to provide an interface between those doing research and those applying the results of research in analytical chemistry, the editors wish to encourage submission of reports on developments and new techniques in fields such as

1. Toxic Impurities in Biological Systems
2. Food Additives
3. Pharmaceutical and Drug Analysis
4. Pesticides and Fungicides
5. Clinical Chemistry
6. Materials, Science and Engineering
7. Geochemistry
8. Environmental Analysis

Contributions will be expected to be of the high standard set and maintained by *Talanta* and to make a definite and useful contribution to analytical chemistry: they must be new publications. Papers may be written in English, French or German. Equal importance is attached to fundamental research work and to applications of practical importance. Reviews of rapidly expanding fields or of hitherto widely scattered material are welcomed but should be critical. Original papers, short communications and reviews are refereed in the usual way: preliminary communications (intended for the rapid publication of novel ideas and lines of research) are refereed urgently and published direct from typescript to give utmost speed of publication. Correspondence of interest to analytical chemists is published at the discretion of the Editor-in-Chief.

Talanta Annual Subscription Rates (1985)

Multiple-reader institutions: US$330.000 (2-yr rate US$627.00).
Specially reduced rate to individuals: US$75.00.
